Urban building research

Architectural and sculptural research fragments are being designed as urban and architectural projects. Plans in this portfolio get updated constantly and are being used as basis for different Design realisations for Exhibitions, books, videos, lectures, furniture, buildings and urban planning.

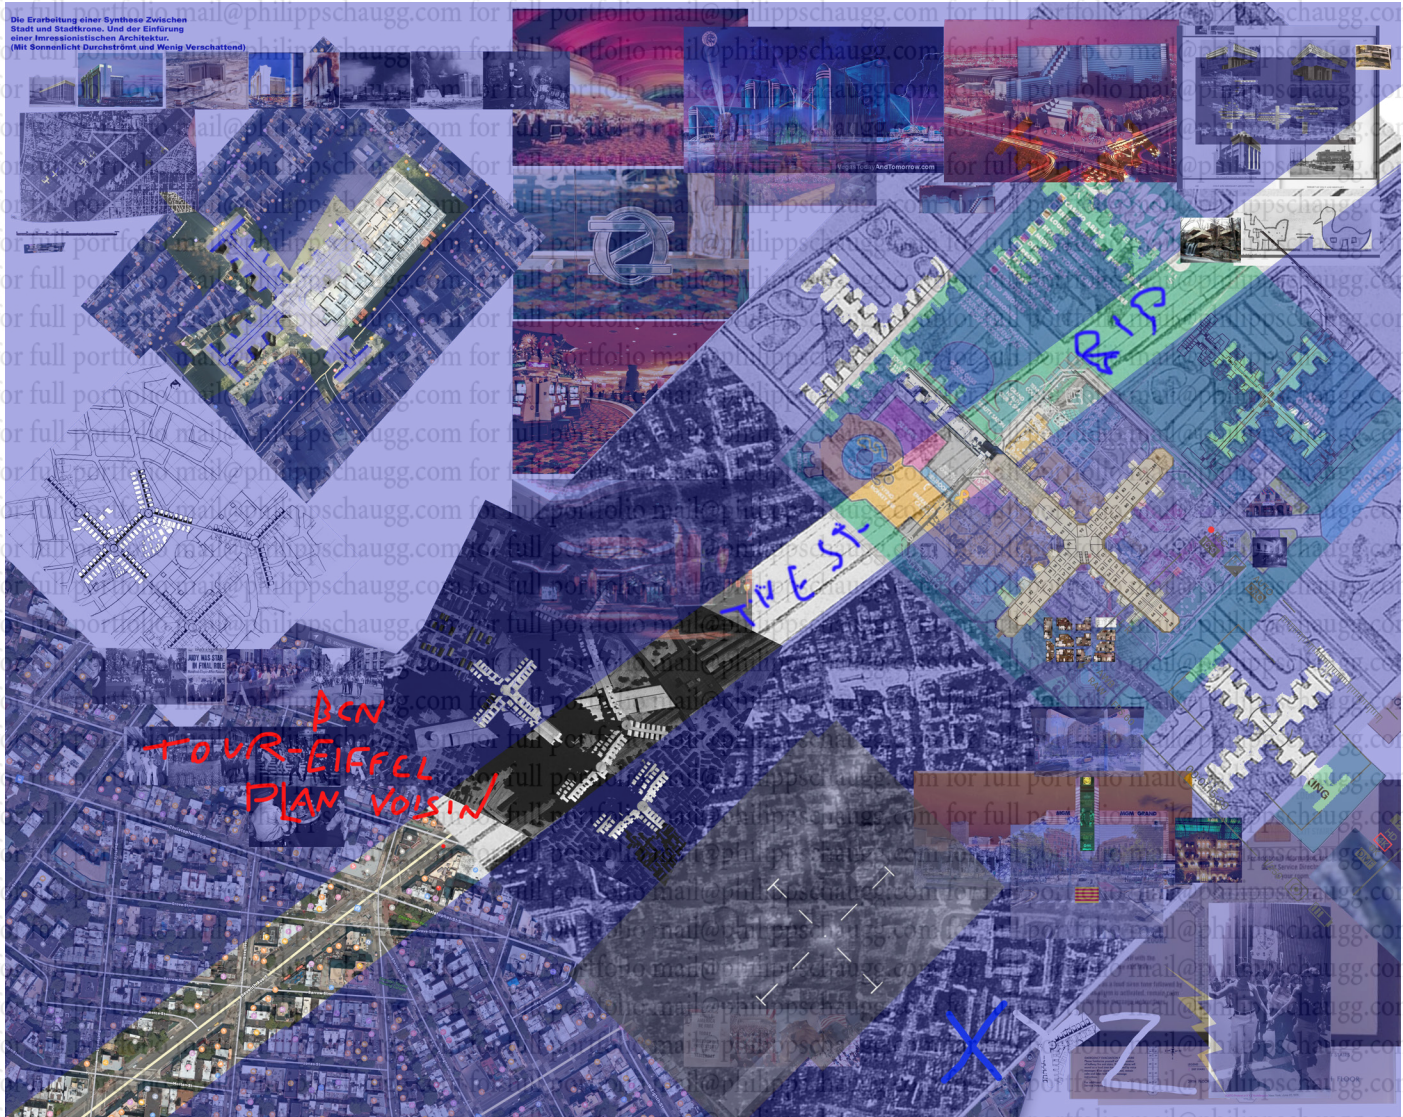

ubr
Urban Building Research

findings are represented as architectural designs for concrete places. Plans for buildings that can be built. The amount of findings is constantly growing. The city maps on which the designs are drawn are constantly updated.

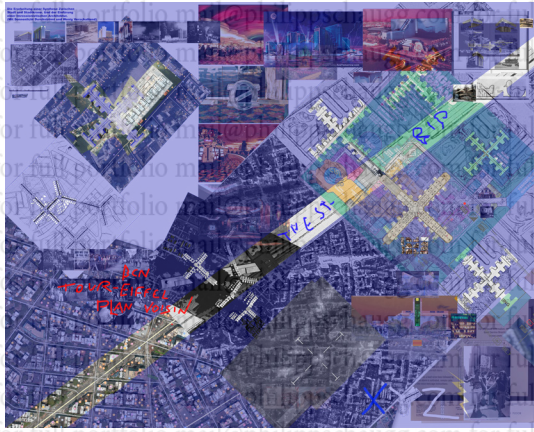

Architektonische und Skulpturale Rechercheartefakte werden zu städtischen Situationen und Architektur entworfen. Die Pläne in diesem Portfolio werden ständig aktualisiert und werden als Grundlage und dienen als Basis für Ausstellungen, Bücher, Videos, Vorträge, Möbel, Gebäude und Stadtpläne.

Description

Philipp Schaugg presents works from the series UBR (Urban Building Research)." displayed as photo collages and a video in the exhibition space. They consist of an extensive photo archive of highly structured architecture and urban plans, aircrafts, and statues combined with signs and cultural products to trace origin and similarities between them. With a pseudo-godly birds-eye view of all information his material is accompanied by the artists anthropological storytelling as he searches for the roots of human society and culture.

Description

Rome is represented by an arial view of the city on wich the artist added images, scale drawings and texts about the city. One added aspekt are the different stages of the great fire of rome during the time of Nero, wich burned down the city in an expanding fire storm that went around the roman hills. The expansion of the fire and direction of the fire
